

2017 TOP COMPANIES

Measure What Matters

Participate in Top Companies for Women Technologists, the leading program measuring companies' technological workforces.

What is Top Companies?

Companies submit aggregate employee data. AnitaB.org analyzes the progression of women's careers and provides feedback to companies in a detailed report. AnitaB.org also benchmarks the technical workforce as a whole, tracking progress in gender diversity across a wide range of industries.

Participating companies show their commitment to creating inclusive workplaces, and help AnitaB.org create industry guidance by providing valuable insights into the workforce.

PILOT: Workplace Experiences Survey

Additionally, AnitaB.org offers an optional employee survey to gain further insights into your company's culture.

- Technical employees answer questions about company culture, team experiences, and career opportunities.
- AnitaB.org uses this anonymous data to advance our research on creating workplaces where women technologists can thrive.
- Participating companies receive additional recognition and a second report with workplace experience analysis.

Basic Package: **\$1,000**

- Individual report with Top Companies results
- Recognition as a participant
- Visibility at Grace Hopper Celebration as a Top Companies participant

Premium Package: **\$3,600***

- Basic Package plus:
 - Workplace Experiences survey, with deeper analysis of the employee experience
