A Message from Our President & CEO

At AnitaB.org, we aim for intersectional gender equity and pay parity in the tech ecosystem. That's been our goal from the start, and we continue to work towards that goal through our mission and in all that we do.

I'm proud to say that we saw a significant increase in people who were directly served by our organization last year, through events, programs, celebrations, webinars, and workshops. And what a momentous experience it was to gather - 30,000 strong - in person and virtually for Grace Hopper Celebration 2022!

Our Membership Program is as strong as ever, hosting events and building the community that so many women and non-binary technologists need. We've seen significant growth in the Apprenticeship Pathway Program – 4x more participants than in 2021 - creating access into full-time tech careers for those historically excluded. And our research continues to show that organizations like AnitaB.org are greatly needed to spark the movement necessary to create change in the industry. In fact, our Top Companies for Women Technologists report states that only 27.6% of the tech workforce are women.

We've made great strides, but there is still so much work to be done. On behalf of the team at AnitaB.org, I would like to sincerely thank you for your support as we continue to work towards an inclusive tech ecosystem. Together, we'll chart The Way Forward.

Our Mission

At AnitaB.org, a global nonprofit organization, we envision a future where the people who imagine and build technology mirror the societies for whom they build it. We connect, inspire, and guide women & non-binary individuals in technical fields, as well as organizations that view technology innovation as a strategic imperative.

Our “Why”

REPRESENTATION

- **Lack of 50/50 equity in the tech workforce** is a global problem.
- Products and services are being created without input from over half of the population.

WORKFORCE DEMAND

- **With a 15% job growth projection in the next decade**, the tech industry is the fastest growing sector in America.¹
- However, 60% of all new jobs in the early 21st century will require skills possessed by only 20% of the current workforce.²
- The best way to meet this demand is to expand the talent pool by bringing in more groups who have been historically excluded from the tech ecosystem.

ECONOMIC IMPACT & INNOVATION

- **Innovation drives over 50% of the US economy**, and the US government has become increasingly concerned with addressing gender and racial disparities in tech.³
- As diversity in teams and businesses increase, creativity and innovation also increase.
- America's economy and global competitiveness suffer from a lack of women and non-binary people in the tech workforce.
- America must increase and diversify its STEM workforce in order to produce the innovation required to remain globally competitive.

ATTENDEE TESTIMONIAL

“

I was able to meet and connect with many inspiring women in the field and exchange our information and backgrounds! Thank you so much for giving me the opportunity to attend it and I am excited to pass [on] what I learned to others.

”

– GHC 22 Attendee

Open Source Day

Open Source Day (OSD) is an all-day hackathon at GHC during which participants can work with peers as well as experienced mentors to contribute to projects that solve real-world issues.

Participants can attend workshops designed to level-up and learn new skills in open source and engage with the open source ecosystem, no matter their experience level.

86%

of evaluation respondents learned new skills or information that will help them advance their career

90%

of evaluation respondents report that OSD met or exceeded their expectations

“It was a great experience for me making my first Open Source contribution and it felt really nice to know that I made a small impact through my efforts.

“Since this was my first time participating in an OSD, it was enriching for me to just observe and learn how people contribute in such platforms. Being able to interact with them is something that I really cherished.

“Since Open Source Day, many of the participants have gone on to continue contributing, particularly to a disaster response effort that occurred a few weeks later.

Workforce Advancement

Apprenticeship Pathway Program (APP)

Launched in March 2021, the AnitaB.org Apprenticeship Pathway Program (APP) increases the representation of Black, Latinx, Indigenous, LGBTQIA+, women, men, and non-binary people in the tech industry. Apprentices get paid to learn during the program and, upon successful completion, can convert to a full-time software development career.

Apprenticeship Pathway Program (APP)

PARTICIPANT TESTIMONIAL

“The APP program is an amazing kick-start to a journey in tech. It provides fundamental knowledge of software engineering with an amazing community of support. Ultimately coding is not as hard as one may think, especially with people on the same journey as you that are there to help you. Strength in unity.”

Policy & Advocacy

Policy & Advocacy

Policy & Advocacy at AnitaB.org brings together allies and champions across every sector to advance intersectional gender equity in technology. Through strategic engagement and activism, we collaborate with mission-aligned partners, empower grassroots advocates, and influence policymakers in order to drive solutions for a more equitable tech ecosystem. Here are the topics that AnitaB.org champions through our policy and advocacy work.

Labor & Workforce – We seek policies and legislation that diversify and accelerate pathways for inclusion in the tech workforce.

Education – We advance policies that expand and increase STEM education opportunities to diversify the tech workforce, as well as policies that provide diversity and equity in both industry and academia.

Diversity – We pursue policies that will diversify the tech workforce and support legislation that provides equal rights, access, and opportunity for women, non-binary folks, and other historically excluded communities.

Emerging Technology – We support and seek policies that build protections to ensure tech reflects our diverse society and the people who create it.

Legislative Highlights

AnitaB.org works to educate elected officials, policy makers, and key agency decision makers to advance legislation that supports and advances women and non-binary technologists in the workplace. We also engage and mobilize members in these efforts including, calls to action, sign-on letters, and educational programming. Here are few 2022 highlights:

- Published the 2022 Election Toolkit
- Created the 2022 US and Global Policy Primers
- Held Hill briefing for legislators on the latest AnitaB.org research, TechEES on the state of 'women-in-tech'
- Hosted two Power to the People series including Digital Privacy & Abortion Rights, and Taking Charge Beyond the Ballot

USofTech

The United States of Technologists (USofTech) is a collective effort to bring a diverse group of 10,000 technologists into the public sector across state, local, and federal government.

We are part of the growing movement of public interest technologists, “adopting best practices in human-centered design, product development, process re-engineering, and data science to solve public problems in an inclusive, iterative manner - continuously learning, improving, and aiming to deliver better outcomes to the public.”

As stakeholders affiliated with 45+ entities, this collective is advancing public interest tech in government. We aim to inspire, support, and place technical and tech-adjacent talent across data science, customer experience, cybersecurity, IT, design, software, and other modern tech disciplines into public service.

Together, we stand as a united voice in advancing governments’ tech talent workforce.

“

I received 5 job offers, from which I am happy to have selected one that will take place across the country and in an exciting new field!

“

Since becoming a GHC scholar, I felt like I was given an additional resource for opportunities and support that became useful when my return offer was rescinded.

Kamala Scholars

The Kamala Scholars Program supports 3rd & 4th year undergraduate students by providing programming all year round and the opportunity to experience GHC. These students receive the following to support them in securing employment opportunities and advancement in their tech journey.

60 Participants

completed the Kamala Scholars program

6 Group Mentoring & Training Sessions

60-minute sessions to present their authentic selves at GHC

“I have never felt more motivated than when I received a Kamala’s Scholarship to attend Grace Hopper Celebration and be part of AnitaB.org. I felt inspired by other women. My dream was to attend in person and have a unique experience because I never attended an event before; however, I enjoyed it virtually. That experience changed my life because, before, I felt unrepresented and unmotivated. After that experience, I realized that it doesn’t matter where I came from; my dreams also have value. I am grateful for the opportunity that the scholarship provided me.

Research

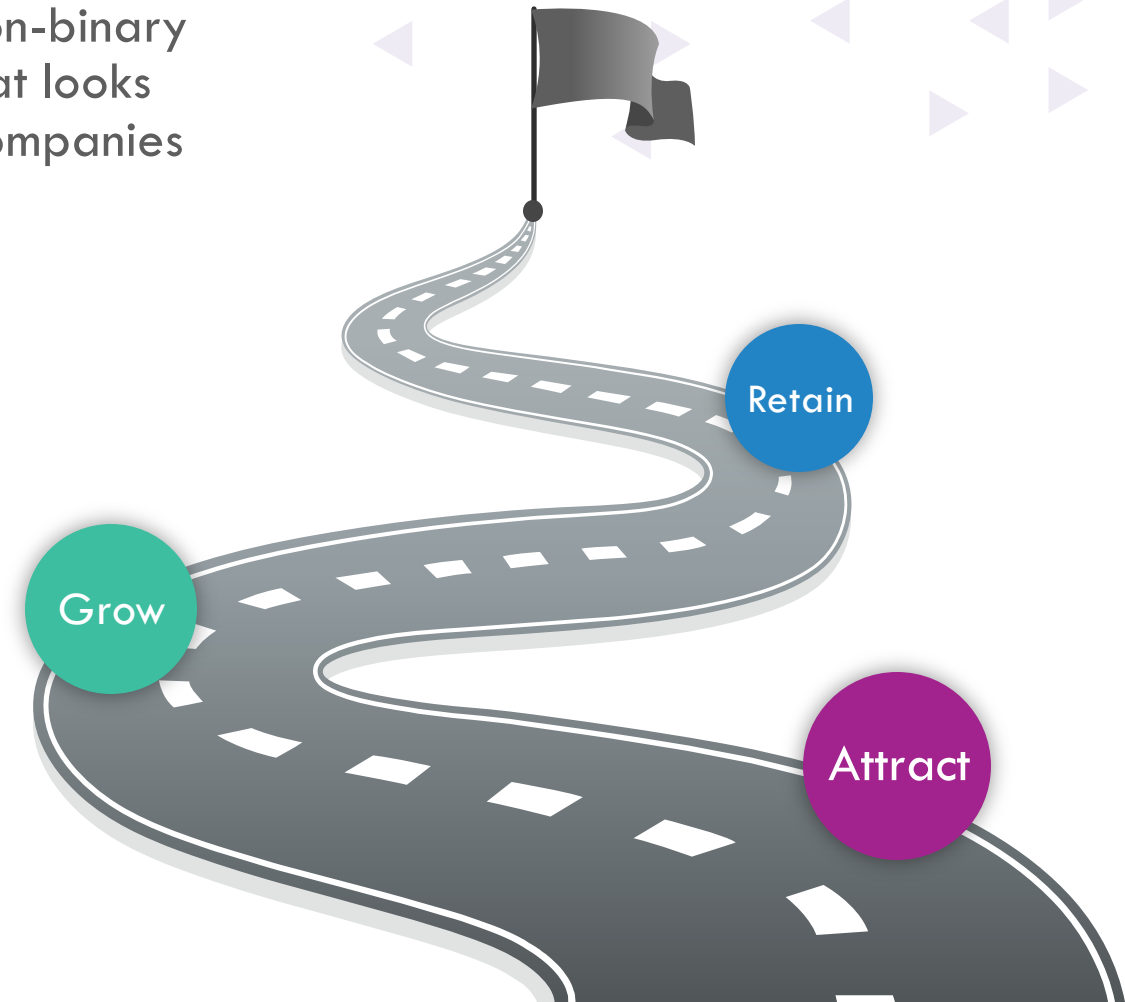

Top Companies

Top Companies for Women Technologists is a national program from AnitaB.org that **engages companies to identify key trends in workforce equity** impacting women and non-binary technologists. It is the only benchmarking program that looks specifically at the technical workforce and awards companies that are making the most progress toward equity.

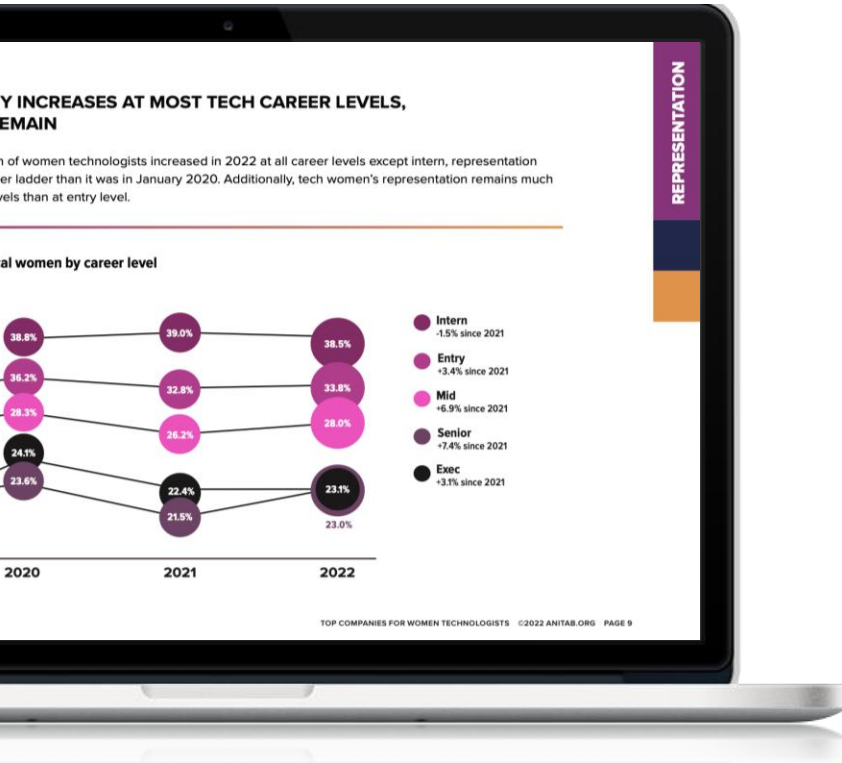

AnitaB.org provides participating companies with a detailed evaluation and benchmark of their intersectional gender equity in tech and a **roadmap for concrete steps they can take to improve their equitable practices** that attract, grow, and retain women and non-binary technologists.

Top Companies

MOST RECENT DATA

422,494

total US-based technologists measured across various industries in 2022

52 companies

analyzed by AnitaB.org in 2022 for data on representation, programs, and policies

Key Findings

- Representation of tech women on the rise, but still below pre-pandemic levels.
- Gender diversity increased at most tech career levels, but inequities remain.
- Positive trends in hiring still fall short of parity.
- Tech women's attrition more than doubled in 2022.

Top Companies

PARTICIPANT TESTIMONIAL

“Top Companies gives us another lens through which to view our ID&E efforts, validate what is working, and find new areas of focus. The data, and particularly our ability to review the data with an AnitaB.org partner, helps us put our work into perspective within the industry in a way we simply couldn't do on our own.”

TechEES

The Technical Equity Experience Survey (TechEES) is an annual global survey from AnitaB.org of the individual experiences of people in the field of technology. TechEES examines the ways in which women & non-binary technologists experience equity and inclusion in the field and provides insights on the state of gender inequity in tech over time, as well as recommendations to the tech ecosystem about how to foster intersectional tech equity. SUPPORTING OUR MISSION

When you give to AnitaB.org, you support a mission that is making an incredible impact in advancing women and non-binary technologists.

We are continuing to build a stable and sustainable organization to meet the needs of those we serve, developing programming that is responsive to their needs. We strive to build trusting relationships with donors and supporters to foster innovation and longevity.

By educating the philanthropic community on the importance of unrestricted giving to organizations like ours, we build equitable relationships and greater return on investment (ROI) for everyone.

But we still have a long way to go!

DONOR TESTIMONIAL

“

Attending the Grace Hopper Celebration in 2012 changed the course of my career. I realized I was not alone. AnitaB.org has built an incredible community that supports women and non-binary technologists. Through AnitaB.org events, I developed connections with role models, peers, and supportive communities. These connections are incredibly beneficial for my career in Tech and Art. Therefore, I decided to give back to my community by donating part of the proceeds generated from the auction of Running Moon, a generative art system I created in 2022.
